OROVILLE CA 95965 Preliminary Hip Dysp	ORANGEVALE CA 95662 lasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION		
Preliminary Hip Dysp CXCELLENT HIP JOINT CONFORMATION Superior hip joint conformation as compared with other individuals of the same breed and age	Idasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six moriths		
Preliminary Hip Dysp The Excellent Hip Joint Conformation Superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION Well formed hip joint conformation as compared with other individuals of the same breed and age FAIR HIP JOINT CONFORMATION	DRANGEVALE CA 95662 Idasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in as morbid. MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints MODERATE HIP DYSPLASIA		
Preliminary Hip Dysp EXCELLENT HIP JOINT CONFORMATION superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION well formed hip joint conformation as compared with other individuals of the same breed and age	ORANGEVALE CA 95662 lasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six morths. MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints		
Preliminary Hip Dysp The Excellent Hip Joint Conformation Superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION Well formed hip joint conformation as compared with other individuals of the same breed and age FAIR HIP JOINT CONFORMATION	ORANGEVALE CA 95662 Ilasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six morths. MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints MODERATE HIP DYSPLASIA well defined radiographic evidence of dysplastic changes of the hip joints SEVERE HIP DYSPLASIA		
Preliminary Hip Dysp The Excellent Hip Joint Conformation Superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION Well formed hip joint conformation as compared with other individuals of the same breed and age FAIR HIP JOINT CONFORMATION	DRANGEVALE CA 95662 Idasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six morbidance MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints MODERATE HIP DYSPLASIA well defined radiographic evidence of dysplastic changes of the hip joints		
Preliminary Hip Dysp EXCELLENT HIP JOINT CONFORMATION superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION well formed hip joint conformation as compared with other individuals of the same breed and age FAIR HIP JOINT CONFORMATION minor irregularities of the hip joint conformation as compared with other individuals of the same breed and age RADIOGRAPHIC FINDINGS	ORANGEVALE CA 95662 BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six morthsplasia at this time Repeat study in six morthsp		
Preliminary Hip Dysp Texcellent Hip Joint Conformation Superior hip joint conformation as compared with other individuals of the same breed and age GOOD Hip Joint Conformation as compared with other individuals of the same breed and age With other individuals of the same breed and age FAIR HIP JOINT CONFORMATION minor irregularities of the hip joint conformation as compared with other individuals of the same breed and age RADIOGRAPHIC FINDINGS subluxation	DRANGEVALE CA 95662 Idasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time - Repeat study in ax morbids MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints MODERATE HIP DYSPLASIA well defined radiographic evidence of dysplastic changes of the hip joints SEVERE HIP DYSPLASIA radiographic evidence of marked dysplastic changes of the hip joints unilateral pathology left right		
Preliminary Hip Dysp EXCELLENT HIP JOINT CONFORMATION superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION well formed hip joint conformation as compared with other individuals of the same breed and age FAIR HIP JOINT CONFORMATION minor irregularities of the hip joint conformation as compared with other individuals of the same breed and age RADIOGRAPHIC FINDINGS	DRANGEVALE CA 95662 Idasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six moritis MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints MODERATE HIP DYSPLASIA well defined radiographic evidence of dysplastic changes of the hip joints SEVERE HIP DYSPLASIA radiographic evidence of marked dysplastic changes of the hip points unilateral pathology left right transitional vertebra		
Preliminary Hip Dysp EXCELLENT HIP JOINT CONFORMATION superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION well formed hip joint conformation as compared with other individuals of the same breed and age FAIR HIP JOINT CONFORMATION minor irregularities of the hip joint conformation as compared with other individuals of the same breed and age RADIOGRAPHIC FINDINGS subluxation remodeling of femoral head/neck osteoarthritis/degenerative joint disease	DRANGEVALE CA 95662 BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six months MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints MODERATE HIP DYSPLASIA well defined radiographic evidence of dysplastic changes of the hip joints SEVERE HIP DYSPLASIA radiographic evidence of marked dysplastic changes of the hip joints unilateral pathology left right transitional vertebra spondylosis		
Preliminary Hip Dysp EXCELLENT HIP JOINT CONFORMATION superior hip joint conformation as compared with other individuals of the same breed and age GOOD HIP JOINT CONFORMATION well formed hip joint conformation as compared with other individuals of the same breed and age FAIR HIP JOINT CONFORMATION minor irregularities of the hip joint conformation as compared with other individuals of the same breed and age RADIOGRAPHIC FINDINGS	DRANGEVALE CA 95662 Idasia Evaluation Report BORDERLINE HIP JOINT CONFORMATION marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time Repeat study in six moritis MILD HIP DYSPLASIA radiographic evidence of minor dysplastic changes of the hip joints MODERATE HIP DYSPLASIA well defined radiographic evidence of dysplastic changes of the hip joints SEVERE HIP DYSPLASIA radiographic evidence of marked dysplastic changes of the hip points unilateral pathology left right transitional vertebra
